Fixed Completion Date:

October 2020

U.S. Department
of Transportation

**Federal Highway
Administration**

Building the Redfish trail, one load at a time.

Construction Activities & Upcoming Work

The Stanley to Redfish Trail Project was feeling the pains of late spring rain and snow earlier this week, but as the week rolled along the working conditions improved, and once again the crews are busy making trail. Currently the trail begins at the City Park and is headed southward toward the final destination at Redfish Lake Road. Caution is advised in the City Park area as crews are currently working in and around the park which is the current access point for the north end of the trail.

Work on the Redfish Trail will be ongoing throughout the entire summer. Work schedules at this point will be five days a week, including every other Saturday. Working hours are currently set from 7:00 am to 7:00 pm. The current schedule also has the crews out of the park area in a few weeks, opening up the City Park for summer festivities. This coming week crews are scheduled for Monday the 6th thru Saturday 11th. Saturday the 11th is scheduled to be a short day finishing by 2:PM.

Please be very cautious when in the vicinity of the trail construction crews.
Thank You.
